

## **JON ROMBOUGH**

I am seeking election to the Desert Horizons Board of Directors to continue contributing my experience in construction, technology, and community service. My professional background includes more than fifty years in residential and commercial construction, with responsibilities in project planning, estimating, contract administration, site supervision, and financial oversight. I also spent two decades in software development, creating data-driven tools that improved operational efficiency for businesses and organizations.

Since joining Desert Horizons, I have served on both the HOA and previous Club Board of Directors and participated in several committees, including Maintenance, Courts and Fitness, Renewal, Landscape, and Emergency Preparedness. I continue to serve as a Block Captain. My prior community leadership includes serving as Finance Director of the Discovery Bay Yacht Club, where I was responsible for budgeting, long-range planning, and financial reporting.

A community survey last year showed that many residents felt trust in the Board had declined. I believe rebuilding that trust requires open meetings, clear communication, and decision-making processes that are visible and understandable to homeowners. As an active pickleball player who values all our community amenities, including golf and fitness, I support their importance to the overall community experience. My objective is to support effective governance by encouraging participation, strengthening transparency, and improving the structure and consistency of Board operations. I am committed to contributing to a friendly, informed, and engaged community.
